2025 Microwave and Radiofrequency Ablation
Reimbursement Coding Guide
EFFECTIVE JANUARY 1, 2025

This is general reimbursement information only and is intended to assist in the compliance of complex and changing reimbursement policies. It is not legal advice, nor is it advice about how to code, complete, or submit any particular claim for payment, nor is it intended to increase or maximize reimbursement by any third-party payor. This information has been gathered from third-party sources and was correct at the time of publication and is subject to change without notice. It is the provider's responsibility to exercise independent clinical judgment to determine appropriate coding and charges that accurately reflect all the patient's conditions and services provided. These should be recorded in the patient's medical record. The information provided here is for informational purposes only and represents no statement, promise or guarantee by AngioDynamics concerning levels of reimbursement, payment, or charges.

Payors may have their own coding and reimbursement requirements and policies. If reimbursement questions arise for a particular patient, providers should contact the payor to confirm current requirements and billing policies. All decisions related to reimbursement, including amounts to bill, are exclusively that of the provider. Providers should check and confirm coding from complete and authoritative coding sources to ensure accuracy. This document is not intended to promote the off-label use of medical devices and physicians should use medical devices fully consistent with all government requirements. The content is not intended to instruct hospitals and/or physicians on how to use medical devices or bill for healthcare procedures. CPT codes © 2024 American Medical Association. Liver Microwave & Radiofrequency Ablation

Physician, Hospital OPPS, ASC Coding & Payment (January 2025 - December 2025)

According to an American Medical Association (AMA) and American College of Radiology (ACR) co-publication¹, “microwave is part of the radiofrequency spectrum, and simply uses a different part of the radiofrequency spectrum to develop heat energy to destroy abnormal tissue.” Therefore, the AMA/ACR recommends that microwave ablation be reported using CPT® codes for radiofrequency ablation. Below is a list of commonly reported CPT codes for liver tumor ablations and Medicare national average payment rates.

Medicare 2025 National Average Payment (Not Geographically Adjusted)

ICD-10-CM Diagnosis Codes (October 2024 - September 2025)

Diagnosis codes are used by physicians and hospitals to document all patient conditions associated with the hospitalization. Secondary diagnosis codes corresponding to additional conditions at the time of admission, or developed subsequently, and which influence the treatment received or the length of stay should be reported. The ICD-10-CM codes below are examples of diagnosis codes that may apply for liver tumor indications^{7,8}. The provider should refer to a complete coding authority to check, confirm, and report all codes that accurately describe all the patient's conditions.

ICD-10-CM ^{7,8}	ICD-10-CM Description (Diagnosis Codes) ^{7,8}
C22.0	Liver cell carcinoma
C22.1	Intrahepatic bile duct carcinoma
C22.2	Hepatoblastoma
C22.3	Angiosarcoma of liver
C22.4	Other sarcomas of liver
C22.7	Other specified carcinomas of liver
C22.8	Malignant neoplasm of liver, primary, unspecified as to type
C22.9	Malignant neoplasm of liver, not specified as primary or secondary
C78.7	Secondary malignant neoplasm of liver and intrahepatic bile duct
C7A.098	Malignant carcinoid tumors of other sites
C7A.1	Malignant poorly differentiated neuroendocrine tumors
C7A.8	Other malignant neuroendocrine tumors
C7B.02	Secondary carcinoid tumors of liver
C7B.8	Other secondary neuroendocrine tumors

The listed ICD-10-PCS procedure codes are examples of codes that may apply for liver tumor ablation procedures.

HCPCS Codes

Healthcare Common Procedure Coding System (HCPCS) Level II codes were developed to help categorize, document, and track the use of products, supplies, and services. HCPCS codes should be reported for all device-dependent Ambulatory Payment Classifications (APCs) for procedures conducted in the hospital outpatient setting. While HCPCS codes do not generally result in additional payment, it is important for hospitals to use HCPCS codes as a means of cost reporting which CMS uses to help determine future payment rates. The HCPCS codes listed below may be used for endovenous ablation procedures.

Reimbursement Terminology

Term	Description
APC	Ambulatory Payment Classification
APC (C)	Not paid under OPPS. Admit patient. Bill as inpatient.
APC (N)	Paid under OPPS; payment is packaged into payment for other services. Therefore, there is no separate APC payment.
APC (Q1)	<p>Paid under OPPS; Addendum B displays APC assignments when services are separately payable.</p> <p>(1) Packaged APC payment if billed on the same claim as a HCPCS code assigned status indicator "S", "T", or "V".</p> <p>(2) Composite APC payment if billed with specific combinations of services based on OPPS composite-specific payment criteria. Payment is packaged into a single payment for specific combinations of services.</p> <p>(3) In other circumstances, payment is made through a separate APC payment.</p>
APC (Q2)	<p>Paid under OPPS; Addendum B displays APC assignments when services are separately payable.</p> <p>(1) Packaged APC payment if billed on the same claim as a HCPCS code assigned status indicator "T".</p> <p>(2) In other circumstances, payment is made through a separate APC payment.</p>
APC (J1)	Paid under OPPS; all covered Part B services on the claim are packaged with the primary "J1" service for the claim, except services with OPPS status indicator of "F", "G", "H", "L" and "U"; ambulance services; diagnostic and screening mammography; all preventive services; and certain Part B inpatient services.
APC (T)	Procedure or Service; Multiple Procedure Reduction Applies. Paid under OPPS; separate APC payment.
ASC	Ambulatory Surgery Center
APC (S)	Procedure or Service, Not Discounted When Multiple. Paid under OPPS; separate APC payment.
ASC (G2)	Non-office-based surgical procedure added in CY 2008 or later; payment based on OPPS relative payment weight
ASC (N1)	Packaged service/item; no separate payment made.
CMS	Centers for Medicare & Medicaid Services
CPT	Current Procedural Terminology
C-Code	Device category codes reported by hospitals in conjunction with outpatient hospital procedures
Facility	Physician payment level for professional services provided in a facility setting such as a hospital or ambulatory surgery center
Non- Facility	Physician payment level for professional services provided in a non-facility setting such as a physician's office
ICD-10-CM	International Classification of Diseases, 10th Revision, Clinical Modification
ICD-10-PCS	International Classification of Diseases, 10th Revision, Procedure Coding System
IPPS	Inpatient Prospective Payment System
MS-DRG	Medicare Severity-Diagnosis Related Group
OPPS	Outpatient Prospective Payment System
W MCC	With Major Complications and Comorbidities
W CC	With Complications and Comorbidities
W/O CC/MCC	Without complications or comorbidities, and without major complications and comorbidities.

"As currently practiced, CPT codes 32998, 47382, and 50592 should be used for both microwave and radiofrequency ablation in their respective anatomic locations in conjunction with the associated imaging guidance code (e.g., 76940, 77013, or 77022). Microwave is part of the radiofrequency spectrum, and simply uses a different part of the radiofrequency spectrum to develop heat energy to destroy abnormal tissue. 12. Use 53899 to report procedures in the kidney that do not have a specific code.
13. Use 32999 to report procedures in the lung that do not have a specific code.

14. CPT® guidelines instruct that you should not choose a code that merely approximates the service provided. You should report the service using only the appropriate unlisted procedure code if no such specific procedure or service code exists. You must report a Category III code when available in place of an unlisted procedure code. When reporting a procedure with an unlisted code, submit a cover letter explaining the reason for choosing the unlisted code instead of a defined, active code. Include one or more similar codes and compare your service to those codes to justify the claim amount you are billing. Also include the operative notes or other relevant documentation to strengthen the claim and to avoid a possible denial. Your payors will consider claims with unlisted procedure codes on a case-by-case basis, and they will determine payment based on the documentation you provide.

RISK INFORMATION

Habib 2X Laparoscopic or Habib 4X Laparoscopic Devices:

Indications for Use: The Habib 4X or 2X Laparoscopic device is intended to be used to assist in coagulation of tissue during intraoperative and laparoscopic surgical procedures.

Contraindications: Do not use on patients with cardiac pacemakers or other active implants.

Warnings:

- Do not attach anything (i.e., clamps, etc.) to the device. This may damage the insulation, which could contribute to patient injury.
- Take care when handling as needles can cause injury.
- Do not use if needles are bent or damaged, as it could lead to patient injury.
- Please refer to the generator's user manual for warnings and precautions associated with the use of the generator.

Side Effects: The potential side effects associated with liver surgery are: general problems related to general anesthetics, bleeding, liver abscess, bile leak, liver failure, subphrenic abscess, postoperative heart failure, chest infection, wound dehiscence, wound infection or incisional hernia.

Refer to Directions for Use and/or User Manual provided with the product for complete Instructions, Warnings, Precautions, Possible Adverse Effects and Contraindications prior to use of the product.
