As of February 1, 2021:

■ The Abbott SARS-CoV-2 IgG and AdviseDx SARS-CoV-2 IgM assays have not been FDA cleared or approved. These tests have been authorized by FDA under EUA for use by authorized laboratories. These tests have been authorized only for the detection of IgG and the presence of IgM antibodies against SARS-CoV-2, not for any other viruses or pathogens. These tests are only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostics for detection and/or diagnosis of COVID-19 under Section 564(b)(1) of the Act, 21 U.S.C. § 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.

* Assays under development and not commercially available in U.S.

◆ Assays are FDA cleared and not commercially available in U.S.

Future availability cannot be guaranteed.
