BIVDA congratulates UK winners of the UNIVANTS Healthcare Excellence Awards

BIVDA is pleased to congratulate the three UK care organisations who have received recognition through the UNIVANTS awards programme.

Foundational principles across all winning teams include “UNIFYING” across the care continuum for the development and implementation of “AVANT-GARDE” processes to enable measurable differences to clinical care.

The 2021 submissions included hospitals, commercial laboratories, reference laboratories, and clinics. Applications included best practices across key areas of unmet needs with representation from every region of the world, spanning both emerging and established markets. Following comprehensive judge review, the outcomes revealed 3 top winners, 3 teams of distinction, and 7 teams of achievement.

Please see the below UK organisations which were spotlighted at the presentation ceremony which took place on Friday 17 June.

Croydon Health Services NHS Trust – Top Global Winner

UHCW University Hospitals Coventry and Warwickshire – Award of Distinction

Hampshire Hospitals NHS Foundation Trust – Award of Achievement.

It is always fantastic to see collaboration and best practice being recognised through these awards and we congratulate the winning teams.

Please find Abbott’s Press Release on the UNIVANTS program [here](#) for more information.
