

## Cheers to 5 Years of Healthcare Excellence: UNIVANTS Turns 5!

From mitigating disease outcomes, to screening, to reducing uncertainty, to mitigation of healthcare costs, these are just some of the remarkable outcomes associated with recognized best practices of the UNIVANTS of Healthcare Excellence Program. The UNIVANTS of Healthcare Excellence Program seeks to amplify, recognize and celebrate impressive outcomes enabled by laboratory medicine and in partnership with interdisciplinary teams. This year, however, UNIVANTS is also celebrating a HUGE milestone – 5 year anniversary.

Across these 5 years of recognizing teams, galvanizing change and inspiring measurably better health outcomes, the UNIVANTS award program has recognized 53 best practices to date spanning different disease states, geographies, interdisciplinary teams and laboratory testing. In its 5th year, UNIVANTS will recognize additional teams from the 2022 award applications with impressive collaborations and awe-inspiring outcomes – be the first to know by visiting [www.univantsHCE.com](http://www.univantsHCE.com) on June 26th for the global unveiling.

To further mark the occasion of such a monumental anniversary, the UNIVANTS of Healthcare Excellence Program, in partnership with AACC, will be hosting the inaugural UNI5K fun walk/run in honor of the power of laboratory medicine on Monday, July 24, 2023. Join friends, colleagues and teammates in this health-centered celebration. To register and/or learn more, please visit [UNI5K | AACC.org](http://UNI5K | AACC.org).

As the UNIVANTS of Healthcare Excellence program has moved from its infancy to the global, prestigious program that it is today, we thank all program partners, advocates, champions, and YOU. The improvements to patient care and outcomes, enhanced decision-making and reduced healthcare costs (to name a few impressive KPIs) would not be possible without the insights and motivation of laboratory medicine professionals. As we think about all that has been accomplished thus far, exciting opportunities exist in healthcare today and we look forward to the outcomes yet to be realized.
