

Care.  
For good.

# Premier Integrated Labs Wins Prestigious UNIVANTS Of Healthcare Excellence Award 2024

23 July 2024

Premier Integrated Labs has been awarded the prestigious UNIVANTS of Healthcare Excellence Award 2024, standing out as the sole winner from Asia, alongside other winners from Canada and the United States.

This award, established by Abbott in collaboration with leading healthcare institutions, celebrates exceptional achievements and innovations in the healthcare field.

Premier Integrated Labs earned this recognition for its groundbreaking work in the early detection of metabolic dysfunction-associated steatotic liver disease (MASLD). Utilising the FIB-4 scoring system, we have set a new standard for early disease detection and patient care. Our efforts have screened over 39,000 patients, identifying more than 5,000 at moderate or high risk for MASLD. This has significantly enhanced clinical decision-making and highlighted the critical role of laboratory medicine in public health.
